

chen yongliang

陈泳梁

UX / INTERACTION DESIGNER

PROFILE

Interaction Designer and Digital Media Artist with cross-disciplinary training from Bauhaus-Universität Weimar and HfK Bremen. Specialized in bridging creative coding, physical computing, and human-centered design to create intuitive, immersive user experiences. Experienced in rapid prototyping with both code and hardware.

TECHNICAL SKILLS

DESIGN TOOLS

Figma, Adobe CC (InDesign, Photoshop, Illustrator, After Effects)

PROTOTYPING

ProtoPie, p5.js, Processing, Arduino/ESP32

CREATIVE CODING

JavaScript/HTML/CSS, Python, TouchDesigner

3D & MOTION

Blender, Cinema 4D, WebGL/Three.js

RESEARCH

User Testing, Design Thinking, Wireframing

LANGUAGES

Chinese	Native
English	C1
German	B2
Japanese	N1

WORK EXPERIENCE

UX PROTOTYPER & INTERACTIVE INSTALLATION ARTIST

Freelance, Bremen & Weimar | 2020 – Present

- Designed and developed 6+ interactive installations combining sensor-based inputs (Kinect, ultrasonic, infrared) with real-time generative visuals
- Created responsive UI prototypes using p5.js, JavaScript, and physical computing platforms (Arduino, ESP32)
- Conducted iterative user testing in exhibition contexts with 500+ visitors

ACADEMIC ASSISTANT – DIGITAL MEDIA ARTS

ICI, Xiamen University | 2019 – Present

- Supported curriculum in interaction design, creative coding, and digital prototyping
- Mentored students in user-centered design processes and interactive media projects

CO-FOUNDER, GAME DESIGNER & ART DIRECTOR

Cheap Universe Game Studio, Xiamen | 2017 – 2019

- Led UX/UI design and art direction for interactive game products
- Designed user flows, interface layouts, and interactive feedback systems

EDUCATION

MA, MEDIENGESTALTUNG (MEDIA ART & DESIGN)

Bauhaus-Universität Weimar | 2025 – Present

BA, DIGITAL MEDIA

Hochschule für Künste Bremen | 2020 – 2025

BA, DIGITAL MEDIA ARTS

Xiamen University | 2015 – 2019

SELECTED PROJECTS

Abyss Archive (2026) — Interactive media installation: custom web UI + TouchDesigner projection + user behavior-driven generative system

Iterative Live (2023) — Real-time Kinect motion tracking + prompt-driven generative algorithms

SA(f)E SPACE (2022) — Wearable interactive device with distance sensors reacting to human proximity

The Window (2018) — Interactive browser game exploring information architecture and user agency
