

chen yongliang

陈咏梁

CREATIVE TECHNOLOGIST

PROFILE

Creative Technologist and Media Artist working at the intersection of interactive installations, real-time generative systems, and spatial media. Trained at Bauhaus-Universität Weimar with deep expertise in TouchDesigner, projection mapping, physical computing, and sensor-driven interaction. Portfolio includes 6+ exhibited installations across Germany and China exploring themes of technological materiality, surveillance, and ecological speculation.

LANGUAGES

Chinese Native
English C1
German B2
Japanese N1

TECHNICAL SKILLS

Real-time Systems

TouchDesigner, GLSL/HLSL Shaders, OSC/MIDI, Art-Net/DMX

Creative Coding

p5.js, Processing, Python, JavaScript, HTML5 Canvas

Physical Computing

Arduino, ESP32, Kinect (depth sensing), ultrasonic/infrared sensors, circuit bending

Spatial Audio

Multi-channel 3D loudspeaker arrays, spatial mixing

Projection & Lighting

Multi-projector mapping, moving heads, motorized stage elements

3D & Visualization

Blender, Cinema 4D, WebGL/Three.js

Generative AI

Real-time text-to-image API integration, ComfyUI, Stable Diffusion

Design Tools

Adobe CC (Photoshop, Illustrator, InDesign, Premiere, After Effects)

WORK EXPERIENCE

MEDIA ARTIST & CREATIVE TECHNOLOGIST

Independent Practice, Bremen & Weimar | 2020 – Present

- Conceived, designed, and technically implemented 6+ interactive media installations exhibited in galleries and public spaces
- Developed real-time generative visual systems using TouchDesigner with Kinect motion tracking, sensor data, and AI-driven image generation
- Engineered custom physical computing setups: wearable sensor devices, reactive LED systems, hand-soldered analog synthesizers from electronic waste
- Designed and operated spatial audio systems (32-channel 3D loudspeaker arrays) and DMX lighting compositions

CREATIVE ASSISTANT

Hafnia Foundation, Xiamen / Valparaíso | 2020

- Supported international art production with technical setup, 3D visualization, and documentation

CO-FOUNDER & TECHNICAL DIRECTOR

Cheap Universe Game Studio, Xiamen | 2017 – 2019

- Built interactive real-time systems and managed full technical pipeline for game installations

EDUCATION

MA, MEDIENGESTALTUNG (MEDIA ART & DESIGN)

Bauhaus-Universität Weimar | 2025 – Present

BA, DIGITAL MEDIA

Hochschule für Künste Bremen | 2020 – 2025

BA, DIGITAL MEDIA ARTS

Xiamen University | 2015 – 2019

EXHIBITIONS & INSTALLATIONS

Abyss Archive (2026) – Media installation: period-accurate desktop PC + custom web interface + TouchDesigner projection, speculative Antarctic ecology & AGI

ScreamingMinerals (2024) – Sound performance: hand-built oscillating instruments from semiconductor minerals & e-waste

Iterative Live (2023) – Projection mapping + Kinect motion tracking + prompt-based generative AI algorithms

Polytope XIa (2023) – Site-specific audiovisual installation: 32-channel 3D sound + moving head lights + multi-projector mapping, Speicher XI A, Bremen

SA(f)E SPACE (2022) – Interactive wearable mask with distance sensors + dance performance

Artificial Eclipse (2022) – AR + CRT installation exploring technological "black box" epistemology, Galerie Flut
